

FAQ ENERGY STAR® Lighting Certification Changes

1. What changes are being made to the ENERGY STAR® lighting certifications?

- a. The United States Environmental Protection Agency (EPA) is sunsetting its lighting certifications for specified lamps and luminaires, effective December 31, 2024. This means certain lighting products will no longer be eligible for ENERGY STAR® certification.

2. Why are certain lighting certifications being sunset?

- a. The changes are part of the EPA's efforts to adapt to the evolving market and focus on new areas of energy efficiency. The goal is to support programs, methods, and services that overcome barriers to efficient electrification, especially for overburdened households.

3. What products does this sunsetting effect?

4. What does that mean for products I currently have?

- a. You can still enjoy their high-quality, energy-saving lights. When replacing them, you can rely on the same trusted brands and use the lighting facts label for key information.

5. Where can I find more information on this topic?

- a. Visit our blog page (Amconservation.com/blog) to read more on this topic from an interview with an ENERGY STAR representative.
